

# Carbon neutral airline by 2030

2023

## Conducting a comprehensive assessment of environmental aspects

Setting targets to become a carbon neutral airline and composing our environmental plan

## Formulate our company's environmental policy

Adding carbon optimising requirements to our investments and agreements

## Raising environmental awareness

Increasing awareness of environmental impact within our organisation & among our partners

2024-2029

## Waste management implementation

Applying waste management practices in line with our company's environmental policy

## Fleet modernisation

Continuously updating our fleet to reduce emissions per passenger-kilometer

## Operational improvements

Optimising processes according to our company's environmental policy

## Fostering a culture of sustainability

Actively involving staff in environmental initiatives & recognising sustainable behaviours

## Investing in alternative energy

Fully transitioning to 100% alternative energy usage in our operations

## Stakeholder engagement

Implement carbon neutral solutions in catering, ground handling and other processes

2030

## CARBON NEUTRALITY

We have established ourselves as a carbon neutral airline by the year 2030

## Monitoring and reporting

We continue to track emissions and report on carbon neutrality process

## Continuous improvement

Regularly updating carbon neutrality strategies based on technological advancements
